LIFE INSURANCE MANAGEMENT SYSTEM - WORKFLOW

1. HOMEPAGE FLOW

Homepage Contains:

- About Company
- Life Insurance Statistics
- Why Choose Us
- Login
- Register
- Contact / Footer

Flow:

1. Visitor opens homepage.
2. Can:
    - Read about company.
    - Register as new customer.
    - Login (Customer / Agent / Admin / Claims Officer).
3. After login → Redirected to role-based dashboard (JWT authentication applied).

2. AUTHENTICATION & SECURITY FLOW

Module: User & Security Management

- Registration
- Login
- Password Hashing
- JWT Authentication
- Role-Based Access Control
- Secure APIs

Flow:

1. User registers.
2. Password stored using hashing.
3. On login:
    - Credentials validated.
    - JWT generated.
4. Dashboard loads based on role.

3. ADMIN WORKFLOW

A. User & Role Management

Admin can:

- Add / Edit / Delete Users
- Register Agents
- Register Claims Officers
- Assign Roles

B. Plan Management (Plan ≠ Policy)

Admin creates Life Insurance Plans.

Each Plan contains:

- Plan Name
- Sum Assured Range
- Tenure Options
- Premium Calculation Logic
- Eligibility Rules

CRUD operations supported.

C. Business Analytics Dashboard

Admin can view:

- Total policies
- Active / Suspended / Lapsed
- Claims analysis
- Revenue trend
- Conversion rate
- Renewal rate
- Agent performance
- Commission overview

4. CUSTOMER WORKFLOW

Step 1: View Plans

Customer logs in → Views all life insurance plans.

Can:

- Search
- Filter
- Compare

Step 2: Request to Buy

Customer:

- Selects plan
- Clicks **"Request to Buy"**
- Submits request

Policy Status:

Draft → Submitted

5. AGENT ASSIGNMENT WORKFLOW

When a customer submits a policy request:

- The system selects all active Agents.
- It assigns the policy to the Agent with the **least number of active policies**.
- In case of equal workload, the Agent who was least recently assigned is selected.
- The assigned Agent alone can access and process the policy.

6. AGENT WORKFLOW

Agent Dashboard Shows:

- List of **Assigned Policies**
- Policy Status (Submitted / Under Review / Active / Rejected)
- Commission Summary
- Total Earnings
- Monthly Commission
- Policy-wise Commission

Customer details are visible **only inside assigned policy view**, not as a general customer list.

Step 1: Review Assigned Policy

Agent opens assigned policy request.

Step 2: Collect Eligibility Details

Agent collects details of customer :

- Age
- Income
- Occupation
- Risk details
- Coverage requirement

Step 3: Premium & Coverage Recommendation

Agent:

- Evaluates eligibility
- Determines coverage
- Calculates premium dynamically based on:
    - Age
    - Income
    - Risk category
    - Tenure
    - Sum assured

Agent explains:

- Premium amount
- Coverage benefits
- Tenure
- Terms & conditions

Step 4: Customer Submits Required Details

Customer now submits:

Nominee Details

- Nominee name
- Relationship

- Age
- Contact details
- Percentage allocation

(Multiple nominees allowed)

Required Documents

- Identity proof
- Address proof
- Income proof

Document Status:

Uploaded → Under Verification → Verified / Rejected

Step 5: Policy Approval / Rejection

Agent verifies:

- Eligibility
- Nominee details
- Documents
- Risk profile

Policy Status:

Submitted → Under Review → Approved → Active
OR
Submitted → Under Review → Rejected

If Approved:

- Policy becomes Active
- Invoice generated
- Commission calculated

If Rejected:

- Customer notified
- Policy closed

7. COMMISSION CALCULATION

Commission based on:

- Premium amount
- Coverage amount

Example:

Lower premium → Lower %
Higher premium → Higher %

Formula:

```
Commission = Premium × Commission %
```

Agent dashboard shows:

- Policy-wise commission
- Total commission
- Monthly earnings

Admin sees full commission analytics.

8. PREMIUM PAYMENT WORKFLOW

Billing Module:

- Invoice generation
- EMI schedule
- Payment history
- Payment tracking

Payment Status:

```
Invoice Generated → Pending → Paid / Failed
```

9. GRACE PERIOD & LAPSATION

If unpaid:

```
Pending → Grace Period (30 Days)
```

If not paid:

```
Grace → Suspended → Lapsed
```

Claims not allowed in Suspended or Lapsed state.

10. POLICY ENDORSEMENT

After Active:

Customer may request:

- Address change
- Nominee change
- Increase sum assured

Flow:

Active → Endorsement Requested → Under Review → Approved → Updated

11. CLAIMS WORKFLOW

Customer selects Active policy → Raises claim.

Must:

- Enter claim reason
- Upload supporting documents

Claim Status:

Submitted

12. CLAIMS OFFICER ASSIGNMENT WORKFLOW

When a customer raises a claim:

- The system selects all active Claims Officers.
- It assigns the claim to the Officer with the **least number of active claims**.
- In case of equal workload, the Officer who was least recently assigned is selected.
- Only the assigned Officer can access and process the claim.

13. CLAIMS OFFICER WORKFLOW

Officer verifies:

- Policy validity
- Payment history
- Grace/Lapse status

- Claim documents

Claim Status:

Submitted → Under Review → Approved → Settled
OR
Submitted → Under Review → Rejected

Customer notified automatically.

14. POLICY LIFECYCLE

Draft → Submitted →
Under Review → Approved →
Active →
Grace → Suspended → Lapsed →
Renewed / Cancelled

15. CLAIM LIFECYCLE

Submitted →
Under Review →
Approved → Settled
OR
Rejected

COMPLETE END-TO-END FLOW

1. User opens Homepage.
2. Customer registers and logs in.
3. Customer views available plans.
4. Customer submits “Request to Buy” for a selected plan.
5. System automatically assigns an Agent.
6. Agent evaluates eligibility and calculates premium.
7. Customer submits nominee details and required documents.
8. Agent verifies and approves/rejects the policy.
9. If approved, policy becomes Active and billing starts.
10. Commission is generated for the Agent.
11. Grace period and lapsation logic applied if premium is unpaid.
12. Customer raises claim if required.
13. System automatically assigns Claims Officer.
14. Claims Officer verifies and approves/rejects the claim.
15. Notifications are sent at every major stage.
